  - Current and past medications
- Please keep me updated via case conferencing

I hereby refer the above named patient to a GMC registered specialist at Cannabis Access Clinics.

Practitioner Signature:  Date (DD/MM/YYYY):  /  /

## About Cannabis Access Clinics

Cannabis Access Clinics are focused on helping doctors and patients navigate the regulatory pathway for prescribing medicinal cannabis products in the UK.

Our GMC specialists and supporting multidisciplinary team work closely with patients who suffer from indications for which there is evidence that medicinal cannabis therapies may be beneficial.

We welcome referrals from GP's or Specialists who feel their patients may benefit from medical cannabis therapy. Our doctors can consult patients at our physical clinics, or nationwide through our video based telehealth service.

Our doctors, under the guidance of our medical director, anaesthetist and pain consultant Dr Gerard Sinovich, are familiar with qualifying conditions for medicinal cannabis treatments, and products legally available for prescription. All prescribers work and prescribe out of CQC registered locations.

Our team collaborates closely with patients' existing GP and Specialist(s) to keep them informed about the progress of consultations. We also provide ongoing monitoring and reporting of patient status to patients clinicians via Video Conferencing.

All patients seen by our specialists are enrolled in CACOSUK observational study, which monitors the efficacy and safety of cannabis based products in a UK population.

**To refer a patient, please complete the Referral Form on the reverse page, or for more information contact us on 020 3322 4688 or [info@caclinics.co.uk](mailto:info@caclinics.co.uk)**
